Stratco Homeline® Verandahs | Patios | Carports

Outdoor Patio Living

Expand your home and lifestyle outdoors with the Stratco Homeline Patio. The Homeline offers a range of affordable patios in both flat and gable designs. The Homeline Patio can be either attached to the home or freestanding. Choose from a range of popular colours and cladding profiles. Pick from our standard kit sizes, or we can design a verandah to your exact specifications.

Strong And Attractive Patios

Depending on requirements, Homeline Patio frames are constructed from 76 x 38mm, 100 x 50mm or 150 x 50mm Patio Tube. The frames are available in a range of popular pre-painted colours.

The patio columns are made from 76 x 38mm, 100 x 50mm, 75 x 75mm, 90 x 90mm and 100 x 100mm posts that can be powder-coated in a large choice of colours.

The versatile Homeline Patio offers a choice of either Prodek®, Superdek®, Smoothdek roof cladding or Cooldek® insulated roofing panels. The roof cladding is offered in the full range of pre-painted roofing colours.

All fixings and brackets are galvanised for a long useable life. A range of external and internal beam connecting brackets and plastic end caps are supplied as standard for a stylish and complete finish.

How To.

MAINTENANCE Regular maintenance is essential to maintain the good looks of all Stratco steel products and to ensure you receive the maximum life-span possible in your area. Washing with clean water must be frequent enough to prevent the accumulation of dust, salts, and pollutants or any other material that will reduce the life of the product. Stratco steel products that are regularly washed by rain require no additional maintenance. No Stratco steel structure or materials are recommended for use over, or in close proximity, to swimming pools or spas. No material that retains water (such as dirt or paving sand) should be placed against the columns. Care must be taken when determining the location of Stratco steel products so that they are not placed in close contact with sources of pollution or environmental factors that could affect the life of the steel. Refer to the 'Selection, Use and Maintenance' brochure for more information.
