Stratco Outback® Verandahs | Patios | Carports | Sunroof

Features & Benefits

Stratco Outback® Verandahs | Patios | Carports | Sunroof

Outback Rooflite®

Maximises natural filtered light under the verandah, and with a self-cleaning domed profile, this maintains its good looks, is UV stabilised for long life, while the opal-coloured material is used for its high light and low heat transmission rates.

Outback Deck Roof Sheets

With maximum single span of 4.5m and double span of 8.4m, the Outback Deck Roof Sheets provides a clean, clear uncluttered appearance with a ceiling like underside finish.

Flush fitting or hidden connections

The Stratco Outback connections have been designed for a smooth flowing look, with flush fitting connections and internal brackets. This provides minimal open crevices for pests, while still being easy to clean and maintain.

Colour Your World.

The beautiful Stratco Outback range offers 8 high gloss framework colours, a variety of high gloss cladding colour options and over 22 gutter and trim colours to match or contrast with your existing colour scheme.

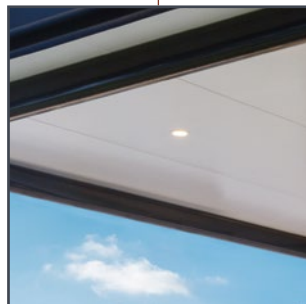

Outback Framework

Manufactured from high tensile steel, you have none of the problems that are associated with timber, such as knotting, twisting, warping, and painting. The framework is roll formed one-piece sections, giving additional strength while minimising any capillary action. This also gives the ability to span greater distances, with less need for additional columns and beams.

Outback Cooldek Insulated Roofing

The insulating properties of Cooldek reduce heat by up to 63% from above on hot days (50mm Cooldek) and reduces noise from heavy rain. Exceptional strength allows Cooldek to span up to an impressive 9 metres unsupported, the ceiling like underside combined with easily mountable accessories provides a seamless indoor/outdoor flow.

Stratco has been around for over 75 years

And with the Outback brand being in existence for over 30 years, this ensures you are dealing with a reputable and reliable company with many years of proven experience.

Complete customisation

The Stratco Outback range is designed as a complete customisable package, giving you the freedom to design your own style, shape, size, and colour, offering you unrivalled design flexibility, and manufactured as a kit to your exact requirements. With Flat, Gable, Curved and Insulated Panel and Opening Roof options, there is the perfect affordable solution for your outdoor requirements.

Stratco Outback system has been designed in accordance with all relevant Australian standards

All Outback designs are supported by in-house engineering and local manufacturing, tested, and certified by both Stratco and Independent Engineers, ensuring a strong, durable patio, with a smoother council approval process.

All colour verandah & patio system

Manufactured from high gloss colours, as well as looking great, it will also add real value to the home. The low maintenance product easily maintains its good looks over time.

25-year structural guarantee, 8-year paint finish and 5-year workmanship

The guarantee provides confidence that the Stratco Outback® is fully supported and will stand the test of time in the harsh Australian environment.
